Ipreo's floating rate business unit offers the most comprehensive suite of products tailored to the trading and management of variable interest rate securities.

Provide Security Master Databases for maintaining critical information for:
- Deal descriptions
- Repricing rules
- Interest payment rules
- Fees
- Sinking fund schedules and call management
- Cusip & Trade Cusip management

Position Monitor provides access to real-time inventory positions for viewing and execution by:
- Traders
- Retail and institutional salespeople
- Institutional clients
- The system provides comprehensive trade validation based on role, security type and firm
- Auto-executing is also available through Bloomberg
- Ability to show inventory to other firms on our system

Data from the Security Master is used to:
- Automate rate resets
- Calculate interest accruals and remarketing fees
- Generate invoices
- Send rate change notifications to all role players
